Erik Powers of Lake Superior Community Partnership visited to review and explore the economic impact study. We need to identify and actualize what we'd like to use these numbers for, how we'd like to best use this information to demonstrate the HMC impact on the community. Round out with more specific survey questions. Ideally, we'd use this information for fundraising to help to encourage people to donate. This information, also would be of great value for attaining grants.

Erik will look into a more localized rate for volunteer reimbursement.
